

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light green color. They are positioned diagonally, with the blue one in front of the green one.

How can AI improve the production in football (NFL)?

By Malcolm Howard

Artificial Intelligence

Goals/Benefits

My goal in this project is to find out how much has artificial intelligence helped the football players on the field in their production rate.

Also to see how the injury rate been since artificial intelligence has been used.

This will benefit football players and coaches who want players.

Concerns

My biggest concern is being able to know how to set up my data and put it in a good order.
