

## 9/17/21 Protocol

- Intro
  - We opened class with a discussion about how AI and computers are related
    - They started out as identical
    - “Normal” people didn’t really understand them
  - Intelligence, learning, thinking
    - Are not fully understood
  - AI right now
    - See ai482/tree/main/4\_ai\_history
  - Stanford webinars
    - Discussed the different options and why it's important to look into the “normal” speech version of the topics
- Discussed the timeline of [AI history](#)
  - In this discussion we covered many of the major milestones in the development of AI, and the progress that has been made in between each step.
  - A few examples I thought of/ brought up in class include
    - Natural Language - [Computer Craft](#)
    - Chat Bots - [Colossal Cave Adventure](#)
    - Big Data/ Deep Learning - [Dating Apps “Elo Score”](#)
- Which AI app of today will change the future of the world and why?
  - Take home question
  - My take - I think there are a variety of AI apps out today that will have a big impact on the future, namely one that can [write computer code](#) from written English and one that can [generate images based on a prompt](#).
- [Here](#) is the whiteboard
